## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28, drawn to an implant, classified in class 623, subclass 17.16.
- II. Claims 29-32, drawn to a method of inserting an intervertebral disc, classified in class 623, subclass 17.11.
- III. Claims 33-47, drawn to a tool, classified in class 606, subclass 63.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the implantable device (group I) can be inserted into the intervertebral disk without the need of the intervertebral tool (group III). The implant can be inserted manually.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be practiced without the steps of having the elastic body had different configurations.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the method of implanting the device (group II) can deploy an

Art Unit: 3738

implant without the steps of having movable members at the distal end of the tool. The tool can use non-expandable members.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Upon the election of **Group I** a further election of species is required.

Species A, referring to Fig. 1; Species B, referring to Fig. 5; Species C, referring to Fig. 6; Species D, referring to Fig. 8; Species E, referring to Fig. 12; Species F, referring to Figs. 15A-15N; Species G, referring to Fig. 17; and Species H, referring to Fig. 22A-22Q.

Upon the election of **Group III** a further election of species is required.

Species A, referring to Fig. 28; Species B, referring to Fig. 29; Species C, referring to Fig. 31; Species D, referring to Fig. 33; Species E, referring to Fig. 34; Species F, referring to Fig. 35; and Species G, referring to Fig. 36.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no generic claims have been found.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3738

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Jason J. Schwartz on July 21, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J Stewart whose telephone number is 703-305-0277. The examiner can normally be reached on Monday-Friday 7:00AM-5:30PM(1 Friday B-week off).
